Protected By
SepClean**

The Drainage System

Because SepClean can be introduced directly to the wc, the biological action also takes effect on drains and pipes, helping to keep them clear and clean. The whole drainage system benefits from SepClean. You can add a sachet of SepClean to external waste traps etc. which are showing signs of blockages or congestion. SepClean will help digest the waste solids and improve the flow, and cleanliness of the system.

Requirements

SepClean will improve the condition of your septic tank where deposits have started to build up. However, if your tank is chronically congested and already in a very poor state (compacted and overflowing etc.) It is recommended that you have the tank emptied prior to using SepClean. Used regularly, SepClean, will prevent the condition from re-curring.

How SepClean Works

Sepclean introduces millions of healthy new micro-organisms to the septic tank, replacing the lost enzymes and redressing the balance, allowing the septic tank to digest the waste products naturally. Breaking down the organic solids and eliminating smells, blockages and overflows.

Why SepClean?

The case for maintaining your septic tank

*Your septic tank is not
causing you any problems?*

*You haven't noticed any
smells have you?*

*Why waste money on your
septic tank? - everything is
ok. Or is it?*

*If the above is the case then
clearly there is no reason to
spend money on SepClean.
Can we draw to your attention
that 75% of our customers
originally had a problem and
wished that they had started
to maintain their septic tanks
earlier.*

*Inefficient septic tank
operation will cause your
soakaway to become clogged.
Often the only way to deal
with a clogged soakaway is to
reinstall the tank with its
associated soakaway.*

Cost £2000 - £3500 minimum

SepClean Prevents Further Problems

Once the septic tank is working properly again, regular use of SepClean maintains the enzyme balance in the septic tank and eliminates the formation of solid deposits. The septic tank requires less frequent emptying and is far less prone to blockages, overflows or seepage in the septic tank. SepClean gives you peace of mind. The septic tank requires less frequent emptying and is far less prone to blockages, overflows or seepage.

SepClean gives you peace of mind.

Easy & Clean to Use

SepClean is introduced into the system by adding 1 sachet to the toilet bowl once a month. The SepClean bio system contains 12 sachet, enough for a full years treatment for the average septic tank. (1200 Litres approx). If you have a larger tank or more than average number of users (4) then you can increase the quantity or frequency of application accordingly. Supplied as a water soluble sachet which will avoid direct contact with product.
